Physical Therapy in San Jose, Los Gatos, Foster City and Burlingame for Soccer

Welcome to MORE Physical Therapy's patient resource about Soccer.

Soccer is a sport that is not only fun to play, but it is a sport that provides a great workout to everyone on the field. However, if the proper conditioning is not in place, the Soccer field can be laden with potential landmines for injury.

The majority of Soccer injuries are directly related to the muscles and joints of the knees, ankles and hips; and because of the repetitive motion associated with this sport, a player might not realize just how bad they are hurt until it is too late.

This area of our site is designed to make you, the Soccer player, aware of the hazards that are prevalent in this sport. We want to make sure you are aware of the exercises and techniques that will keep you from being sidelined.

After all, the world is beating us in this sport and it's time to catch up. To do that, we need you healthy.
